DELPHI

DESCRIPTION OF SERVICES – SEVENTH FEE PERIOD

In the period between October 1, 2007 and January 25, 2008, Thompson Hine LLP (“Thompson Hine”) attorneys, patent agents and support staff worked on thirty-seven intellectual property matters for Delphi and one civil litigation matter. Specifically, in the intellectual property area, Thompson Hine attorneys and personnel worked on twenty utility patent applications, three provisional patent applications, no patentability studies, thirteen patent application amendments responding to Office actions, one state of the art study, no petitions to revive and no European Patent Office responses.

Amendments responding to Office actions. Thompson Hine staff review the communication from the United States Patent and Trademark Office (“Office Action”) and enter pertinent identifying information and due dates into Thompson Hine's computer docket. The matter is then forwarded to an assigned attorney or patent agent who reviews the Office action and determines what amendment or other responsive action is necessary to place that particular patent application in condition for allowance. Next, the attorney or agent discusses the proposed action with the inventor or inventors to ensure that any amendments and arguments made or advanced are technically accurate. Such discussions often include a discussion of cited reference patents that may be included in the Office action. After the discussions are completed, the attorney or agent then prepares an appropriate responsive Amendment that is filed with the United States Patent and Trademark Office.

Utility patent applications. The assigned Thompson Hine patent attorney or patent agent reviews the ROI (Record of Invention) pertaining to the invention, improvement or advancement and, in most cases, discusses the details of the invention with one of the inventors listed in the ROI. Such discussion is often followed by a patentability search that is conducted either by the attorney or a patent agent of Thompson Hine to determine whether there exists pertinent prior art patents that might have an effect on the patentability of the invention or the scope of any potential patent. After completion of the search, the results are reported to Delphi's Legal Department and the attorney prepares the patent application. After the preparation of the application, the inventor is sent a draft and invited to make comments and corrections to ensure that the application is consistent with the Record of Invention and is technically accurate. After the comments from the inventors are received, the application is finalized and is filed with the United States Patent and Trademark Office. If Thompson Hine files the application itself, Thompson Hine staff record the filing information and docket this event in a proprietary computer docket system for appropriate follow-up activity.

Patentability studies. The assigned Thompson Hine attorney or patent agent receives the ROI from the Delphi legal staff and performs searches of the records of the United States Patent and Trademark Office for relevant patents. In some instances, this search is done by using an online searching tool such as Lexis/Nexis. The results are received and reviewed by the Thompson Hine attorney or patent agent and, in some instances, a verbal report was given to the Delphi attorney assigned to the matter. In other instances, a brief memorandum is prepared outlining the basis for the finding of patentability or non-patentability.

Provisional patent applications. The assigned Thompson Hine attorney or patent agent reviews the ROI, discusses the aspects of the invention with at least one of the inventors and prepares a provisional patent application. This provisional patent application is then sent to the inventors for review and comment. The comments received from the inventors are incorporated into the provisional patent application which is filed, either by Thompson Hine staff or by Delphi with the U.S. Patent and Trademark Office.

State of the art studies. The assigned Thompson Hine attorney reviews the ROI and performs a search of the records of the United States Patent and Trademark Office. Often, the search will be expanded at the request of the Delphi legal staff to include foreign jurisdictions, such as European countries and the European Patent Office. In such cases, local counsel in the jurisdictions in question are retained to perform a search. The assigned Thompson Hine attorney receives the results of the searches (typically patents), reviews the documents and prepares a summary that is submitted to the Delphi legal staff.

European Patent Office Responses. Typically, the assigned Thompson Hine attorney reviews the objection issued by the European Patent Office regarding a European Patent Application corresponding to a United States patent application and responds to the objections raised. In most cases, this requires submitting a set of claims recast in European format. In some cases, the claims may need to be narrowed to cover a single inventive concept. In addition, the specification may need to be amended to restate the first claim in the invention summary section.

Petition to Revive. In this instance, the assigned Thompson Hine attorney reviewed the circumstances of the abandonment of the application (not occasioned by action or inaction by Thompson Hine attorneys or staff), reviewed appropriate caselaw, advised the Delphi attorney assigning the matter, and filed the necessary declarations and paid the necessary fees.

Litigation matter (not intellectual property). Assigned Thompson Hine attorney reviewed the litigation docket and the nature of the claim and discussed the status of the litigation with his Delphi contact, and representatives of the parties in the matter of *Hutz v. Gray*, No. 2002 CV400, Comm. Pl., Trumbull Co., Ohio. Defendant was involved in an automobile accident while in the course and scope of her employment with Delphi Corp. Delphi was not named as a party in this suit, although a proof of claim was filed with the bankruptcy court handling Delphi's bankruptcy.
